Date: Tuesday, March 22, 2016 2:21:38 PM

Amy,

There is a big push by the San Jacinto Community, elected official and EPA Region 6 Senior Management to get to a decision on a remedy for the site.

The past few days, we have been internally discussing how to get to a Proposed Plan by November or December 2016.

We are trying to see if we can have a NRRB package ready by the end of June to make the July 25, 2016, meeting in Atlanta.

I know you need to plan these meetings several months ahead of time to set a schedule, but we will get back to you in a few days with a decision and see if we can have the site ready for the July meeting and see if you can work us in. Thanks CAS

Subject: RE: San Jacinto Fact Sheet - NEEDED TODAY!!

Christine,

Current repair started today & is expected to be completed tomorrow. On the FS, the Army COE is doing a review of the river conditions, storms, alternatives, etc.; their report is expected in April & the FS will be completed after that. On the schedule, we are working on updating that now, but for the NRRB the latest date I have is 7/25.

Subject: RE: San Jacinto Fact Sheet - NEEDED TODAY!!

Thanks Gary. First and foremost, thank you so much for the quick turnaround. I have just a couple of questions. The first section mentions the need for repairs in 2012, 2013, and 2015. Should 2016 be added to the list since a repair was recently completed? Also, can you please include a little info on the status of the remedy (FS status, when SJ will go to the NRRB)?

Thanks so much!

Christine

Christine,

I'm attaching an Executive Summary fact sheet updated last week; please let me know if you have any questions on this.

Subject: San Jacinto Fact Sheet - NEEDED TODAY!!
Importance: High

Hi all,

It's my understanding that Robin Richardson has a 4 pm meeting today with the mayor regarding the San Jacinto site. I found an old fact sheet from 2013. I put in a line about the upcoming NRRB review and highlighted a few areas that could use some work. I would greatly appreciate it if you

could provide a high level summary of technical issues, status of Superfund work, etc. Please feel free to insert/remove information/sections as you see fit. A one-pager would be perfect. Obviously, this is a short turn around, so the sooner you can send a revised fact sheet, the better.

Thanks!!!

Christine
